G-Dash Digital Display

A small, flexible, easy to use graphical display.
A totally new, fully configurable, graphical display with a white backlight.

The best compact digital display.

G-Dash is the new AiM graphical display, developed to be connected to our EVO4 DataLogger.

Totally in aluminium, with edge to edge glass and metallic pushbuttons is fully waterproof and extremely elegant and robust.
It is small, compact, extremely flexible

thanks to its graphical display and to the possibility to configure as many pages you wish, each one of them can show from one to four data, in according to your requirements.

Configuration can be managed by PC or directly on the system: you can add, remove or modify pages or information

per every page. Six freely configurable RGB shift lights and four freely configurable RGB alarm LEDs give clear information about the status of your car.

G-Dash receives and shows information also about expansion modules, like to say GPS receiver or our new HD SmartyCam.

Configure the RGB shift lights

Select one among seven colors

GPS Satellites Signal level

SmartyCam Status

Freely configurable pages: examples of pages with two, three or four information
